📍 33 Abu Bakar St., Morgah Rawalpindi, Pakistan

Motivated Front-End Developer & Computer Science Graduate with hands-on experience in React.js, FastAPI, and Machine Learning applications. Skilled in building responsive web applications, integrating AI models, and optimizing user experience. Currently working remotely at AshTech, contributing to scalable frontend solutions. Passionate about applying technical expertise in software development, AI, and web technologies to solve real-world problems.

Education

BS COMPUTER SCIENCE
NUML | 2021-2025 , Pakistan
Final Grade: 3.54 / 4.00

Experience

FRONT-END DEVELOPER
Ash Tech's Software-Remote | 2025-Present

- Developed and maintained responsive, user-friendly web applications.
- Collaborated with backend developers to ensure seamless API integration.
- Implemented performance optimization techniques, reducing load time by 25%.
- Worked in an agile team, contributing to multiple client projects and delivering solutions on time.

MACHINE LEARNING INTERN
Inotech Solution(Pvt) | June 2024 - Aug 2024

- Designed and deployed a machine learning model .
- Built a React.js-based frontend for seamless user interaction with the model.
- Worked collaboratively to integrate the solution into a real-world application.

Skills

- **Languages:** Python, Java, C++, C#
- **Frontend:** HTML, CSS, ReactJS, React-Native, TailwindCSS
- **Backend:** FastAPI, Node.js (basics)
- **Databases:** MongoDB, MySQL
- **Tools:** Git, VS Code, NetBeans
- **Other:** MS Word, PowerPoint, Excel

Projects

- Word/PDF to Text Converter – Built a full-stack web-app using ReactJS, ML model, FastAPI, and MongoDB.
- Fake News Detection System – Implemented NLP & ML techniques for text classification. Built a full-stack web-app using ReactJS, ML model, FastAPI, and MongoDB.
- ML Translation Model – Developed and tested a basic language translation system.
